

Annual health report 2022

Hip scores by breed

Data Calculated to 31/12/22

The following is an annual summary, covering all breeds which have had a least one dog scored, using data from the current approximated breeding population (data from dogs scored in the last 15 years only). By representing dogs scored in the last 15 years, a more accurate reflection of each breed's current state of health and improvement is given. The 5-year median here refers to dogs scored between 1st January 2018 and 31st December 2022. The data reflects Kennel Club registered dogs only. Where results do not exceed 10 dogs tested within a given time period mean and median analysis are not provided due to insufficient data.
